

## A flexible and user configurable Transport Management Solution

Configurable Modules

**Integrated management solution built to enhance the productivity of any transport and logistic operation.**

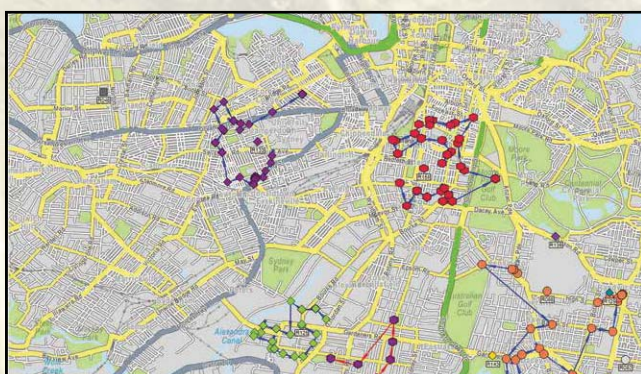

**Manages both casual & permanent Pickups & Deliveries. Optimises runs & routes, using auto - allocation to minimise operator tasks.**

### Modules include:

- Web Booking Module
- Customer Account Management
- High Volume Assisted Job Booking
- Permanent Job Management
- Auto Job Generation
- Run Management & Planning Manager
- Route Optimisation and Auto-scheduler
- Visual Dispatch linked to Map Dispatch
- Map Scheduling and Auto-Dispatch
- Resource and Vehicle Management - including GPS Tracking
- Configurable Rules Engine for Auto allocation
- Customizable Reporting Module
- Customer access to web reporting and job tracking
- OH&S and Driver Safety Management
- Mobile device real-time communication
- Direct interfaces to any back end system
- Intergrates to Trans-D, Yard & Dock management & Line Haul system
- Integrates to sortation systems via LARS

iOS & Android Integration

Intelligent Run Planning

Monitoring of Your Operations

## Benefits

- Work flow automation through mobile devices
- Elimination of errors through removal of paper
- Barcode/RFID tracking
- Proof of delivery
- Track and Trace
- Automated job generation and dispatching
- Option to run manual, semi-auto or full auto-allocation allows dispatchers to progressively build confidence
- Real time visibility of resources and assets
- Vehicle Tracking
- Easy run management with flexible re-planning as the business grows
- Fast calculation of day to day fleet requirements allows planning of changes to the fleet size
- OH&S & vehicle checks increases safety
- Reporting – real-time visibility of productivity and profitability
- System is fully scalable and can handle both small and very large fleets
